

How Move Free works between visits

A simple way to share how you are doing with your therapist.

1

Follow your program

Open your plan, watch the demonstration if one is provided, and follow your therapist's prescription and cues.

2

Tell us how it went

Mark each exercise completed, partly completed, or skipped. Share how it felt or add a note when helpful.

3

Your therapist reviews your progress

Your therapist sees your feedback alongside your goals and decides whether your plan needs a change.

4

Receive guidance

Check Today or Messages for your therapist's guidance. Open Program to see your current prescription.

5

Keep progressing

Follow your updated plan and share your next response. Your feedback helps your therapist guide the next step.

Your therapist reviews updates during their usual working hours. Move Free is not monitored continuously. For time-sensitive concerns, contact your clinic directly.

Stay connected to send feedback and see the latest plan. Home-screen installation is optional.
